

## Safety instructions for Links S, M, L candlesticks

### IMPORTANT NOTICE:

**A) Do not use the candlesticks before reading these instructions!**

**B) Links candlesticks are made from beech wood. Beech is a flammable material and for that reason you should never allow the candles to burn all the way through.**

**They should be extinguished as soon as 5 centimetres of candle are left!**

**C) For Links L you should only use tea-light candles encased in a metal cup.**

**NEVER use tea-light candles without metal case!**

**D) Never leave candles burning unattended!**

**E) Always make sure that Links is stable and resting on a flat, even and non-flammable surface.**
